I am a designer with more than 20 years of experience. With my knowledge and comprehensive experience gained through a multitude of work environments and ability to fully utilise cutting-edge digital technology, I analyse the needs of what is required to best convey messages through art and media specifically needed for the projects. I curate and approach each design work with a fresh perspective, creating a novel and original identity in its own right. I synergise and love to work in teams as one of my philosophies is 'Teamwork Makes the Dreams Work!'
